SUMMARY

Data Engineer with 1 year of experience, working with Snowflake, AWS, Python, SQL, dbt and Airflow, and having worked with Databricks and PySpark. Built landing, staging and common core EDW layers (fact and dimension tables, SCD Type 1/2) for 17 source systems, and automated deployments with GitHub Actions CI/CD. Databricks and AWS certified, with a Python library published on PyPI. Looking for a data engineer role built on mutual growth, where I deliver reliable pipelines and keep learning.

TECHNICAL SKILLS

- **Languages**: Python, SQL, Scala
- **Pipelines & Orchestration**: Apache Airflow, dbt, PySpark, Snowpipe, Snowflake Streams & Tasks
- **Databases & Warehousing**: Snowflake, Databricks (Delta Lake), MySQL, Oracle.
- **Cloud & DevOps**: AWS (S3, Glue, Lambda, SQS, IAM, Athena), Docker, Git, GitHub Actions (CI/CD)
- **Data Modelling & Quality**: Dimensional Modelling, SCD Type 1/2, EDW, Medallion Architecture
- **AI / GenAI**: Agentic AI, LLM Function Calling (Groq), Prompt Engineering, Streamlit
- **Familiar with (foundational):** Apache Kafka, Hadoop HDFS commands, Kubernetes

PROFESSIONAL EXPERIENCE

Capgemini| Chennai, India — Oct 2025 – Present

Data Engineer

- Built Snowflake tables, Snowpipes, streams, and tasks to load S3 data into landing and staging layers for 17 source systems. Designed fact and dimension tables (SCD Type 1/2) in the common core EDW, enabling cross-source analytics across 4 data products.
- Developed AWS Glue PySpark jobs to ingest data from API sources and worked with dbt, Airflow, and Glue ingestion pipelines.
- Managed deployments through GitHub Actions CI/CD with approval gates across DEV, QA, UAT, and PROD, supporting 40+ releases.
- Also gained hands-on experience with PySpark and Databricks over six months while contributing to a separate client project.

PROJECTS

End-to-End Data Engineering CI/CD Pipeline- **[Repository]**

Built a Snowflake ELT platform with GitHub Actions CI/CD, automated environment promotion (DEV/QA/PROD), API-to-S3 ingestion via AWS Lambda, Airflow orchestration, Snowpipe auto-ingest, and SCD Type 2 fact/dimension modeling using streams and tasks.

LoadMark (PyPI Library) – [Deployment]

Developed and published an open-source Python library for incremental-load checkpointing with configurable lookback, backfill support, SQLite/file stores, 32 pytest test cases, and GitHub Actions CI/CD.

AI-Powered Retail Sales Analytics Assistant- [Live App]

Built a PySpark/Scala retail analytics pipeline and a Groq LLM-powered agent that enables natural-language sales querying, deployed through a Streamlit application.

Campus Recruitment Analytics (Databricks)

Implemented Databricks ETL pipelines using PySpark and Medallion architecture, handling data quality checks, schema evolution, and SCD Type 1 fact/dimension modeling with Delta Lake MERGE.

EDUCATION

SATHYABAMA INSTITUTE OF SCIENCE AND TECHNOLOGY| Chennai, India 2021-2025
B.Tech in Information Technology – 82.4%

CERTIFICATIONS

Databricks Certified Generative AI Engineer Associate
Databricks Certified Data Engineer Professional
Databricks Certified Associate Developer for Apache Spark
Databricks Certified Machine Learning Associate
AWS Certified Data Engineer - Associate
AWS Certified Cloud Practitioner
Microsoft Certified: Azure Developer Associate
Claude Certified Developer – Foundations
Claude Certified Associate - Foundations
Data Engineering – FITA ACADEMY
